We would make the perfect pair

In gaming, effortless experiences are a must for your players.

Adyen enables you to expand your reach, supercharge conversion rates, and deliver a frictionless payment process that pleases everyone.

Discover how Payouts, LPMs, Card Acquiring, and Protect can take your gaming offering to unmatched levels of success.

adyen

engineered
for ambition

Speed and reliability with Payouts

Operators need swift, secure payouts to players worldwide.
Adyen's solution delivers:

- Multiple payout options: This includes bank and card transfers and digital wallets, catering to players globally.

- Real-time processing: Instant payouts are standard, ensuring quick access to funds.

- Risk management: Advanced fraud prevention safeguards your business and players' interests.

Effortless payment acceptance with Card Acquiring

Accepting payments from players worldwide can be challenging.
Adyen simplifies the process with our Card Acquiring solution with:

- Global card network coverage: Accept payments from worldwide to regional cards.

- Dynamic 3D Secure: Boost security without hindering legitimate players.

- Unified reporting: Gain insights into player behavior and transactions for informed decisions.

Regional payment preferences with Local Payment Methods (LPMs)

Understanding and accommodating regional payment preferences is crucial.
Adyen's LPMs solution empowers gaming platforms to do just that through:

- Localisation: Offer preferred payment methods like Eftpos and Paypal

- Seamless integration: Manage multiple LPMs effortlessly

- Conversion optimisation: Boost conversions with data-driven LPM choices

Safeguard your earnings with Protect

Protecting your revenue is paramount in the gaming industry, where chargebacks and fraud pose significant challenges. Protect offers robust safeguards with:

- Chargeback prevention: Real-time algorithms identify suspicious transactions.

- Machine learning: Evolving models detect new fraud patterns.

- Dispute resolution: Streamlined process maximizes favorable outcomes.
