Thrive with the right tools

AI is working for the enterprise. 49% of C-suite leaders say their GenAI investments are "outperforming" others.[1] The bigger your organization, the better it gets: enterprises with more than $10 billion in revenue are more likely to report that their GenAI investments outperform other investments.[1]

67% of enterprises say they are increasing investments in GenAI due to the strong value they've experienced to date.[2]

In fact, enterprises with fully implemented AI-enhanced solutions see:

2.5x
higher average revenue growth[3]

2.4x
improvement in productivity[3]

3.3x
higher likelihood to succeed at scaling high-value GenAI use cases[3]

Smart Modes

Activate modes for different scenarios to automate common tasks and group settings, and to optimize system performance.

- ✓ **Shield:** Enhance online security and privacy through auto prompt VPN, privacy alert, and privacy guard features.
- ✓ **Collaboration:** Improve the virtual meeting experience and ensure engaging video communication through video effect features.
- ✓ **Attention:** Minimize distractions by blocking access to pre-set domains and notification.
- ✓ **Power:** Reduce power consumption and improve battery performance by changing the battery setting.
- ✓ **Wellness:** Promote digital health by encouraging regular eye breaks and fostering better ergonomic habits.

Smart Care

Get real-time troubleshooting from real-life technicians and personalized self-help resources.**

- ✓ **Device diagnostics:** Use the device's diagnostics to make more accurate recommendations.
- ✓ **Real-time visibility:** Check on the status of your device and service request.
- ✓ **Instant support:** Get instant support from your desk using your PC — through chat, phone call, or video call.

Smart Share

Developed by Lenovo and powered by Intel® Unison™. Simply tap your phone to the side of your PC screen to share.

- ✓ Users can easily send photos between their devices.
- ✓ Get an instant connection from simply tapping your phone to your PC to launch the app.

**Optional program; limited global availability.

Lenovo

Smarter, safer and ready for business

ThinkPad® X1 Carbon Gen 13 Aura Edition offers powerful performance, advanced AI, and security at your service. When paired with the familiar yet modern Windows 11, productivity and collaboration is boosted while ensuring seamless IT management from day one.

Intel® Core™ Ultra 7 processor

Lenovo ThinkPad® X1 Carbon Gen 13 Aura Edition, imagined with Intel

Powerful for users

Get more done with powerful Intel CPUs paired with a modern interface designed for seamless productivity. Organizations using Windows 11 report a 15% boost in end-user efficiency—making work smoother, faster, and smarter.[4]

AI-powered performance

Simply touch the Copilot key to initiate advanced AI capabilities that improve task management through real-time suggestions, automation of routine processes, and personalized insights.

Seamless IT management

Built on the same foundation as Windows 10, Windows 11 integrates effortlessly into existing IT workflows — no new tools or retraining required.

End-to-end security

Windows 11 offers built-in, hardware-based security, including encryption, malware protection, and cloud-based security configurations — so your organization stays secure from ever-evolving modern threats.

5

Lenovo

Empower your best users with more

ThinkPad® X1 Carbon Gen 13 Aura Edition, imagined with Intel, delivers powerful performance, advanced AI, and security at your service. They are made better with Windows 11, going above and beyond for your high-performance users at all levels and in all locations.
