

If your legacy VDI solution is broken, isn't it time to break up?

Find long-lasting happiness with Omnissa Horizon

They say breaking up is hard to do.

Maybe that's why IT leaders continue to put up with virtual desktop and app delivery solutions that continuously raise prices, while leaving a trail of unresolved support tickets and little to no product innovation.

But it doesn't have to be this way.

It's time to move on if your legacy VDI vendor:

Directs you toward a rigid cloud-centric model before your organization is ready to make such a big leap.

Ghosts you when you need help, leaving you hanging with no response to your support tickets.

Raises prices year over year.

Leaves your product and feature requests unanswered, making you wonder what you're even paying more for.

If any of this sounds familiar, you should seriously consider splitting up with your VDI vendor. But don't despair—finding a happier, healthier relationship is as easy as switching to Omnissa Horizon®.

Omnissa Horizon: the partner you deserve

Horizon is a modern, market-leading solution that can help your organization modernize your desktop and app delivery—all at a lower cost, with predictable pricing and flexible plans tailored to your needs. Here are some highlights of what Horizon brings to the relationship.

Horizon offers flexible and scalable virtual desktop and application deployments, both on-premises and across multiple public clouds. At Omnissa, we empower customers to transition to the cloud at their own pace.

Omnissa App Volumes is the only solution enabling IT teams to package applications once and deploy them everywhere. IT can deliver the same single app copy to users at login, or on-demand with Apps on Demand, simplifying maintenance with single image management and deployment, minimizing app downtime, and reducing management and storage costs.

With Omnissa, you'll get a comprehensive solution that encompasses all your digital workspace needs. You'll enjoy the flexibility to choose the suite, quantity, and duration aligned with your specific needs, along with the operational ease of a single purchase.
